To,
Mr. Ashok Sheth,
Managing Director,
Solitaire Machine Tools Limited,
Baroda.

Dear Ashok,

We have been working together as Business Partners since last 12 years for all stem grinding operations of our Engine valves variants. Over those years, you had supplied to us more than 85 grinders with both options as Conventional and CNC. The performances of these grinders have been excellent. Those grinders are working like original Cincinnati Centerless Grinders in terms of rigidity, accuracy and reliability.

We are a premier supplier for the automotive industry with full capabilities in design, development and manufacturing; we hope that in future with technological development, we will continue our partnership for higher productivity for the remarkable existence in the fields of automotive industry.

Best Regards,

M. P. SHARMA (Associate Vice- President),

Varroc Group Of Industries.
