NEWSLETTER FROM SOLITAIRE MACHINE TOOLS LIMITED

AUG. – OCT. 2009

Dear Friends,

I am writing to you after almost six months, as we all went through a period of gloomy days without any ray of sunlight. The IMTEX in January 2009 had given us some hope, but it did not turn into orders as expected, for most of the machine tool manufacturers.

However, World's Largest Democracy prevailed and brought the Government back to business of managing economy. We have started to see light filter through and all of us have started to feel a little more confident. The four wheeler and two wheeler vehicles sales graphs are going north and auto component export sales is once again picking up. Our cars are sought out by European markets. First NANO car was delivered by Mr. Tata and millions of them would be built to meet domestic and international markets.

In our lean time, we introspected and found lot of ideas on how to improve the machine capability by small improvements. We had a relook at all costs and improved skill of work force. I guess, the downturn was a blessing in disguise.

The REMANUFACTURING and CNC RETROFITTING is getting lot more attention by our customers to use their existing resources and at the same time improve productivity. We are currently working on several grinders for such work. We would be happy to work with you on such projects.

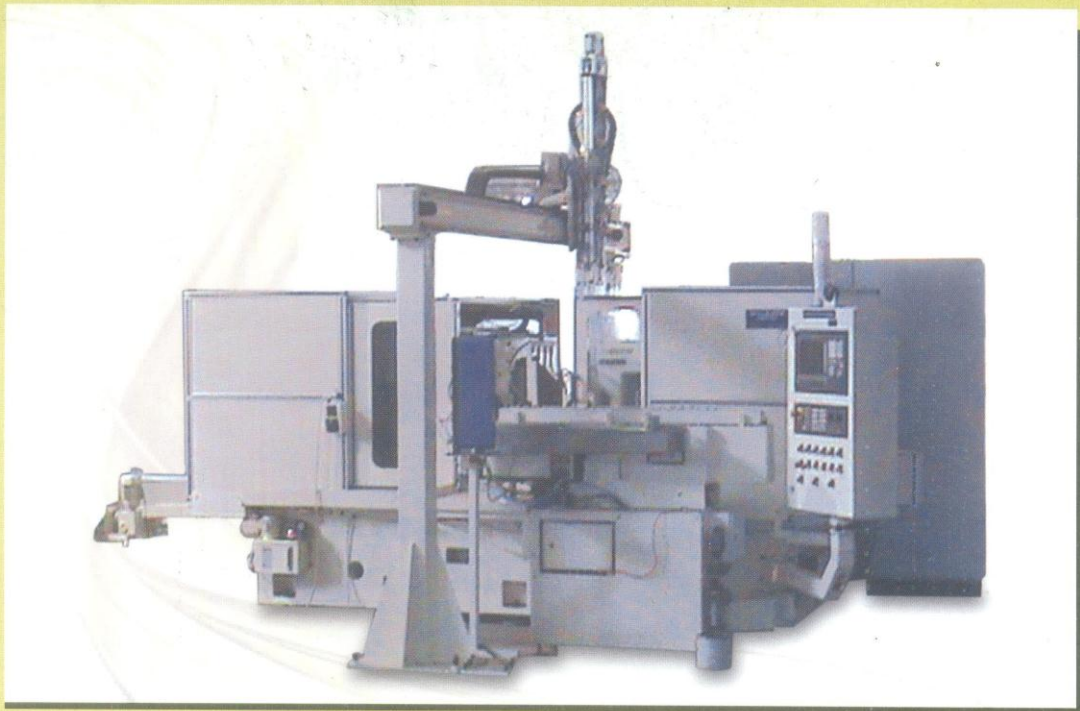

The manufacture of NEW CONVENTIONAL and CNC GRINDERS is continuing as usual and more challenging jobs are being offered to us by our customers. Our new slogan at IMTEX "SMT - Centerless Grinding Solution Provider" is really taking shape. I can assure you that we will make our best efforts as your technology partner and provide all the help to improve your productivity.

For all your future needs and your valuable comments, do contact us at smtgrinders@vsnl.net

With Warm Regards,

P.J. Sheth

Precision to the last micron
